

Introduction to Django

Django is...

- A framework
- Not a programming language
- Very fast for developers
- Secure
- Handy
- Used by many big guys (Instagram, Pinterest, Spotify, NASA)

Framework vs. Library

- A library is a tool
- A framework is a way of life
- A library is just functions you can call
- A framework calls your code
- You call the library
- The framework calls you

Django is a
framework

Python is a
programming lang.

**Django is written on
Python**

Django comes with

- An ORM (talk to the database)
- Admin Panel
- User Authentication
- URL Dispatcher
- Template Engine
- ...
