

Database Migrations

- A migration is a process to change the shape of the database models
- When we add, remove or update a DB Column we have to migrate.
- Also we have to set 'default' values

Is the Cat grumpy?

Editing the Cat Model

```
from django.db import models
```

```
class Cat(models.Model):
```

```
    name = models.CharField(max_length=30)
```

```
    breed = models.CharField(max_length=20)
```

```
    grumpy = models.BooleanField(default=False)
```

Cat

id	name	breed	grumpy
2	Mr. Bunns	British	FALSE
3	Conrad	Siamese	FALSE
4	Shishi	British	FALSE
5	Conrad	Persian	FALSE
